DAILY JOURNAL OF ONEIDA COMMUNITY.

A. D. 1866. MAY 28. NO. 114.

MONDAY.

BUSINESS MEETING ITEMS.

S. W. Nash was appointed to attend to the erecting of another lamp post. It is to be placed in a position where it will light the walks in the rear of the buildings.

It was proposed to proceed at once with the cementing of the Store cellar, as it may be needed for dairy purposes.

More vigilance is needed in keeping account of the time and payment of the hired men, and measures are to be taken accordingly.

A water-wheel is needed at the Foundry. A man at Rome wishes to put in one of his iron wheels, in order that we may test its work by the side of the other kind. It will cost some two or three hundred dollars. Referred to Mr. Burt, G. W. Hamilton and Mr. Kinsley.

John Norton returned from his western trip on Saturday. He had been absent just three months. He reports himself as glad to get home, and as having met with nothing that had any attraction for him in society

outside. Mr. Olds is expected home in the course of two weeks.

1076 curculios were found in yesterday morning's hunt, and 456 in this morning's.

Messrs. Bristol and Bradley went to Black Creek, yesterday, and caught some fine pickerel. A number were brought home alive and placed in the fishpond at the Park.

Our drought seems to have fairly come to an end.—Yesterday and last night it rained finely, and to-day is cloudy and showery. These droppings from the clouds have been thankfully received.

Mr. Worden expects to leave some time this week for Wallingford.

On Saturday, Mr. Worden and his company were employed on the Parsons Road, which was found much worse and needing more repairs than was anticipated. Mr. W. reports his three miles of road, except the newly added portion, as good as the best in the town.

The following conditional order was received a few days since, through the N. Y. B., from Stanton & Co., of Chicago. It is possible that satisfactory terms may not be arranged, but those interested in the fruit department may find some pleasure in looking over the fligures:

ORDER.

Dozens in glass: 5 Damson Plums, 5 Green Gage, 5 Lombards; 20 Strawberries; 20 Orange Raspberries, 25 Red do.; 10 White Cherries, 10 Red do: 10 Pears.

Dozens in Tins: 600 Tomatoes; 450 Corn; 75 Peas. Jellies in Cups, Dozens: 4 Grape, 8 Raspberry, 60 Red Currant, 6 Strawberry, 4 Black Currant, 15 Blackberry, 4 Quince.

In addition to the above he wants Hodge's order, from Chicago, for 1865, amounting to \$319, duplicated.

Speaking of Stanton, H. G. A. says: "I called his attention to the Lunch-Bags, and found he was much pleased with them. He sells lots of Lunch-Baskets and had down on his order book to purchase 6 doz. He gave us an order for 1 doz. to be sent on as samples, and says if his folks at Chicago think as well of them as he does, they will give a larger order. I think he is just the one to take hold of the Lunch-Bag at Chicago. He ordered one for his own use at once. I think if we deal with Stanton as proposed, on the prepayment system, we shall get over the trouble we have had in the past."

It may be explained to the W. B., that their failure to receive the Monday's Journal was due to the fact, that, after being put in the envelop for W., it either dropped out or was taken out by some one, and remained unnoticed in the bottom of the letter-box for several days. Two other Journals have not been printed in time for the mail and had to lie over one day. The mail is always carried down in season to go by the 2.35 train for New York. We intend always to have The Journal ready in time, and think we shall hereafter succeed.

DAILY JOURNAL.

METEOROLOGICAL.

Thermometer, May 26.

6 A. M. 42. Clear and pleasant.

12 M. 68. Clear.

6 P. M. 65. Cloudy.

May 27.

6 A. M. 58. Cloudy,

12 M. 62. Rain, with Southwest wind.

6 P. M. 62. Cloudy, with southerly wind.

There was a slight rain during the night, and several fine showers during the day.
