West Indian Flowers

62 FRUIT AND FLOWERS OF THE WEST INDIES. *Decorative title in pencil and 104 drawings of flowers and fruit, measuring 11¼ × 9 ins., of which 97 are in water colour, the remainder in pencil, bound in contemporary red straight-grained morocco gilt, g.e., with 1 brass clasp, dated May 22, 1834* £170

An exceptionally interesting and meticulously drawn collection of drawings of West Indian plants. Each drawing is neatly captioned at the foot, mostly with their provenance. 82 of the plants are natives of Barbados.

Plants of Penang

61 WARD (Mr. Surgeon) *A Collection of 60 water colour drawings of flowers, fruits and plants, measuring 19½ × 15 ins., by a native artist, with captions and index, bound in contemporary half russia (rebacked), Penang, ca. 1830* £300

An extremely beautiful collection of drawings of exotic flowers and fruits. The large and highly finished illustrations are similar in style to the work of Indian artists of this period. They are mostly captioned in English, Latin and the vernacular. A contemporary note on the fly-leaf reads: "Collected by Mr. Surgeon Ward, E.I.Co., principal medical officer in the Island of Penang, about 1830—he printed an account of the Island (at Penang)."

Fine drawings of this type are rare.
